NA : Not Available - * Liberia, Cameroon and Ivory Coast surveillance systems are recording suspected cholera cases. - In bold: modified incidence

Faits saillants/Highlights:

Bénin : Du 9/08 au 13/09, 391 cas cumulés ont été enregistrés dont 10 décès soit une létalité de 2,56%. De loin la commune la plus touchée est Cotonou avec 283 cas cumulés dont 5 décès. Pas de nouveaux cas rapportés en provenance de Savalou et Dassa-Zoumé depuis le 29 Août. Sur les 42 échantillons de selles prélevées, 22 ont été confirmés au laboratoire national, et 9 en attente de lecture.

Togo : En S36, vendredi 09/09, un cas de cholera confirmé en laboratoire a été rapporté. Le plan de riposte a été déclenché ; pas de nouveaux cas rapportés à ce jour.

RCA : Fort ralentissement de la transmission. Au 5 septembre, 249 cas suspects dont 19 décès sont notifiés. Sur les 47 prélèvements examinés, 8 cas ont été confirmés. Cliquez sur le lien suivant pour trouver les sitrep détaillés : <http://www.platformecholera.info/index.php/departments/140-currents-outbreaks>.

Congo : 6 cas suspects de choléra dont 4 décès ont été rapportés sur l'île Mbamou, district sanitaire de Talangai. Pas de confirmation laboratoire mais investigation en cours.

RDC : A noter l'incomplétude des données en S34. Campagne de vaccination OCV prévue sur Kinshasa en S38.

Nigeria : 19 cas de diarrhées aiguës sévères dont 8 décès ont été rapportés de la structure de santé de Rann, LGA Kala Balge, Etat de Borno (données cumulées sur un nombre inconnu de semaine). L'alerte a été partagée avec les partenaires des 3 pays frontaliers et jusque-là aucun cas suspects dans ces zones n'a été notifié.

Benin : Between Aug 9th and sept 12th, 388 cumulative cases incl. 10 deaths were reported (CFR=2.58%). Cotonou is the most affected area (280 cases incl.5 deaths). No new cases from Savalou and Dassa-Zoume since Aug.29th. Out of 42 stool samples, 22 were positive to V. cholera and 9 pending results.

Togo : As of per week 36, on sep 9th, one cholera case was reported and confirmed. This alert activated the response plan and to date, no additional cases reported.

CAR : High decrease of transmission. As of per Sep 5th, 249 cumulative cases incl. 19 deaths were reported. Out of 47 stool samples, 8 were positive. For more information, go to <http://www.platformecholera.info/index.php/departments/140-currents-outbreaks>

Congo : 6 suspected cases incl. 4 deaths were reported from Mbamou island, Talangai Health District. These cases were not confirmed yet through lab and the investigation is ongoing.

Nigeria : There were 19 AWD (acute watery diarrhea) cases leading to 8 deaths (only reported at the health facilities), in Rann, Kala Balge LGA, Borno State. These are cumulative figures over unknown number of weeks. The information was shared with the 3 neighboring countries. No other alerts were reported from these areas so far.
