Cholera Situation:

Since the first outbreak in late Dec 2014, Mozambique has recorded **5,118** cholera cases with **43** deaths. The situation in Tete Province is the most severe.

Malawi has to date registered **60** cases with **2** deaths since its first confirmed case on 13 Feb 2015. All are related to the outbreak in Tete Province, Mozambique.

In Zimbabwe,**11** cases of cholera have been confirmed since late Feb 2015, with **6** cases in Mudzi district, bordering Mozambique.

In Mozambique, the OCHA-managed Central Emergency Response Fund (CERF) has provided **US$748,857** to support the provision of immediate and life-saving assistance in health, water and sanitation, hygiene promotion, and case management in Tete Province. Mozambique has also reactivated the muti-sectoral technical group to combat diarrheal diseases.

In Malawi, the Health Cluster is continuing to strengthen preparedness and response capacity to cholera in vulnerable districts and Government has established a Cholera Task Force.
