NA: Not Available. * Liberia, Cameroun, Sierra Leone, Cote d'Ivoire, Guinea surveillance systems are recording and reporting suspected cholera cases.

Highlights:

R. D. Congo: The number of cases slightly decreased from 616 to 597 cases between week 12 and week 13. The largest outbreaks (> 100 cases) are still concentrated in North Kivu, Haut Katanga and Tanganyika. In Haut Lomani, there is a doubling of cases from 35 in the week 12 to 80 in the week 13.

Nigeria: The number of suspected cases has increased fivefold since the week 10. These suspected cases remain concentrated in Bayelsa (14 cases), Kano (10 cases) and Taraba (1 case). Since the beginning of the year, 323 suspected cases have been reported, including 20 recorded deaths.

Cameroon: 4 suspected cases of cholera (3 in Garoua and 1 in Buea) were reported during week 12. Since the beginning of the year, 10 suspected cases of cholera including 1 death have been recorded mainly in the Northern region.

Faits saillants :

R. D. Congo : Le nombre de cas a légèrement diminué passant de 616 à 597 cas entre la semaine 12 et la semaine 13. Les foyers les plus importants (>100 cas) sont toujours concentrés dans le nord Kivu, le Haut Katanga et le Tanganyika. Dans le Haut Lomani, on constate un doublement des cas passant de 35 dans la semaine du 12 à 80 dans la semaine du 13.

Nigéria : Le nombre de cas suspects a quintuplé depuis la semaine du 10. Ces cas suspects restent concentrés dans les Etats Bayelsa (14 cas), Kano (10 cas) et Taraba (1 cas). Depuis le début de l'année, 323 cas suspects ont été rapportés dont 20 morts enregistrés.

Cameroon : 4 cas suspects de cholera (3 à Garoua et 1 à Buea) ont été rapportés durant la semaine 12. Depuis le début de l'année, 10 cas suspects de cholera et 1 décès ont été enregistrés principalement dans la région du Nord.
